23 stocks from top 5 PMS schemes that outperformed Nifty in November, worth a look

As many as 218 PMS schemes from the broader markets generated better returns than Nifty 50 in November. Here's a quick look at some of their main stock holdings for the month

GAURAV SHARMA | DECEMBER 15, 2021 / 01:42 PM IST

PMS schemes cater to wealthy investors with portfolio sizes exceeding Rs 50 lakh. Their professional fee structure is different from that of regular mutual funds.

Of 269 schemes tracked by **pmsbazaar.com** in November, 218 generated better returns than the Nifty 50, the data shows. There were 46 schemes that generated positive returns even though the benchmark index witnessed a decline.

Six schemes generated more than 2 percent returns last month, led by Right Horizons – Super Value Fund (+4.58 percent), Silver Arch – Small and Mid Cap Equity Fund (+3.70 percent), Systematix – Dynamic Investment Portfolio (+3.35 percent), Sageone – Small & Microcap fund (+2.75 percent), Composite Investments Pvt Ltd – Emerging Star Fund (+2.65 percent), and Carnelian Asset Advisors – Shift Strategy (+2.18 percent).

However, not all of these top schemes disclosed their stock holdings for November. Moneycontrol has collated a list of the top five from among those that have disclosed their holdings.

Right Horizons – Super Value Fund

Primarily focusing on midcaps, this scheme generated the highest returns of 4.58 percent among all PMS schemes in November. Its top five stocks were **Apollo Pipes Ltd**, **Neogen Chemicals Ltd**, **KEI Industries Ltd**, **Polycab India Ltd** and **Dixon Technologies Ltd**.

8 out of 10 PMSes Out-Performed Nifty in November

The Indian stock benchmark Nifty 50 fell 3.9% in November, but the declines in the broader market were gentler. Midcaps fell 2.7% while smallcaps were largely flat. Naturally, PMS strategies that usually spread their bets across the market performed better. As many as 219 PMSes out-performed the Nifty 50 in November, i.e. almost 83% of the PMS strategies tracked by PMS Bazaar. Due to the lop-sided nature of market performance this month, the best performing PMS strategies belonged to midcap, small & midcap, multicap, smallcap buckets. Here is a recap.

Best strategies of the month

Headlines of a quicker than expected Fed tapering & new Covid-19 variant set off nervousness in stock markets in November. And with markets trading near all-time highs, both in terms of levels and historical valuations, a mild sell-off ensued.

Given that it was a negative month for equities, the top-10 performers totally bucked the trend and delivered reasonable positive gains to investors. Leading the pack was Right Horizons Super Value strategy. This is midcap scheme with almost a 3 year vintage. The PMS gained 4.58% in November, a handsome 700 basis point alpha over Nifty Midcap 100 (down 2.69%). Number 2 this month was Silverarch Mid & Small Cap Equity with 3.7% gain, followed by Systematix Dynamic Investment Portfolio at no. 3 with its multicap theme generating 3.35%.

We Investing in securities including equities and derivatives involves certain risks and considerations associated generally with making investments in securities. The value of the portfolio investments may be affected generally by factors affecting financial markets, such as price and volume, volatility in interest rates, currency exchange rates, changes in regulatory and administrative policies of the Government or any other appropriate authority (including tax laws) or other political and economic developments. Consequently, there can be no assurance that the objective of the Portfolio would achieve. The value of the portfolios may fluctuate and can go up or down. Prospective investors are advised to carefully review the Disclosure Document, Client Agreement, and other related documents carefully and in its entirety and consult their legal, tax and financial advisors to determine possible legal, tax and financial or any other consequences of investing under this Portfolio, before making an investment decision. The composition of the portfolio is subject to changes within the provisions of the disclosure document. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of investments in portfolios. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio Manager to make intended securities purchases due to settlement problems could cause the portfolio to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the portfolio due to the absence of a well - developed and liquid secondary market for debt securities would result, at times, in potential losses to the portfolio.
